

I respectfully urge you to reject NAB petition 04-160, in regard to Instant traffic and weather, I have XM radio and when I am traveling I can get instant traffic and weather report without having to find a local station on my radio. XM radio provides a wide variety of programs and quality program most without commentary and commercials. I and many others pay for these services, and it is our hopes that the FCC not allow NAB what we are permitted to hear, I personally believes that they have over stepped their bounds, The FCC is the regulating Authority and not NAB.
Thanking you in advance.

Respectfully yours
William Kluttz
